AI-ASSISTED CREATION & LICENSE NOTES

PositiveAIArt — https://linktr.ee/positiveaiart — office@positiveaiart.com

OVERVIEW

These digital artworks/videos are designed for calm, meditative viewing and (optionally) iPhone live wallpapers. They are created by me using AI tools with substantial human direction and editing. This note is provided for transparency and to clarify your usage rights.

CREATION PROCESS (VISUAL)

- Concept & Direction: I design the concepts, prompts, scene goals, composition, and pacing.
- Generation: I use AI video/image tools to generate base material.
- Human Editing: I manually curate takes; trim, loop, and time segments; adjust speed; stabilize; reduce noise; grade color and exposure; crop for device aspect ratios; and master final deliverables.
- Wallpaper-Readiness: Where relevant, I produce short, silent variants (≈2.4–2.5 s) suitable for iOS Live Photo wallpapers (lock screen only; no sound).

CREATION PROCESS (AUDIO)

- Composition & Sound Design: I compose original music cues and create sound effects using AI-assisted tools and sample/synth engines.
- Human Editing/Production: I select, edit, blend, and arrange elements; perform mix engineering (EQ, dynamics, space), mastering, and synchronization to picture.
- Rights to Tools & Content: I use paid/licensed tools and libraries that grant commercial usage rights. No third-party music or effects are included unless explicitly stated.

HUMAN AUTHORSHIP

- I am responsible for the creative direction, selection, and editorial control at every stage (ideation, curation, editing, grading, timing, mastering).
- AI assistance is one component of a human-led workflow; final outputs are compiled and authored by me.

RIGHTS & LICENSING SUMMARY

- Ownership: I hold rights in the compiled audiovisual outputs and the original music/sound design I create.
- Your License: Your usage rights are defined in the attached License document (Personal / Extended Personal / Commercial-Micro, or as specified on the product page).

- (summary): No resale, re-licensing, or redistribution of the files “as is” or as stock. No use of brand logos, trademarks, or likenesses in ways that imply endorsement. For broader use (ads, apps, TV, signage, large campaigns), please obtain a custom license.
- Attribution: Not required unless specified by the product, but always appreciated.

PROVENANCE & TOOLING

- I use professional, paid AI tools and services that permit commercial use under their terms at the time of production.
- reasonable request (e.g., for enterprise licensing), I can identify major tools used for a given pack/version.
- I do not include any third-party elements (logos, identifiable private persons, copyrighted works) without proper rights.

CONTENT & SAFETY STANDARDS

- No faces/likenesses without consent.
- No private or sensitive data.
- No trademarks/logos unless clearly permitted.
- Calming/positive aesthetic: nature, abstract, contemplative scenes; non-exploitative content.

BUYER TAKEAWAY

- AI-assisted, human-directed: this affects transparency, not your license.
- The included License governs what you can do (Personal / Extended Personal / Commercial-Micro).
- For iPhone wallpapers: set on the lock screen; live wallpapers are silent by design; iOS 17/18 typically requires ≈2–2.5 s and a minimum of 60 frames for “Live” to enable.
