Setup Guide — Free Iphone Live Wallpapers

PositiveAIArt (a brand of **Krassnigg Digital e.U.**)
Version: v1.0 **Date:** 2025-09-24

1) Overview (Read Me First)

What this is: A short, calming video designed to become an iPhone **Live Photo** wallpaper (lock screen animation).
What you get in this download:

- **Video (MP4):** between 2 and 3 seconds, 4k (9:16), 60 fps, **no watermark**, **no audio**
- **License:** *Free Personal (Wallpaper Use)* — specific personal, non-commercial use only
- **AI-Assisted Creation & License Notes** — provenance & transparency
- **Wallpaper** Setup Guide (this file)

Important behavior (iOS) to know about:

- Live wallpapers animate **only on the Lock Screen** (not on the Home Screen).
- Live wallpapers are **silent by design** on iOS.
- On iOS **17 and later**, the clip should be about **2 seconds** and have a minimum of 60 frames total or the "Live" toggle won't enable.

2) Quick Start — iPhone (iOS 17/18)

A) Convert the video into a Live Photo (free, no watermark)

1. **Download** the video to your iPhone (Files or Photos is fine).
2. Install the **VideoToLive** app by Thomas Yoon (free; ads only, no watermark).
3. Open **VideoToLive** → select the downloaded video (limit image access to this single file, if you prefer) and tap "Next".
4. Ignore the warning about a minimum length of 3 seconds in order to use the duration lock. Conversion works fine with the lock function off.
5. (Optional) **Adjust speed** slightly (e.g., **1.25×**) if the motion looks sluggish as wallpaper.
6. Tap **Make → Live Photo (iOS17+)**.
7. Wait for the conversion to finish. An ad will show while converting. At some point, or after closing the ad, the "Complete" message will appear. Your LivePhoto has been saved to where the video file is (or to photos).

B) Set as your Lock Screen wallpaper

1. Open **Settings → Wallpaper → Add New Wallpaper**.
2. Choose **Live Photo** → pick the Live Photo you just saved.
3. Make sure the symbol for **Live** is **ON** (not crossed out) in the lower left of the screen.
4. Tap **Add → Set as Lock Screen**.

Tip: If Live is off/greyed out, see **Troubleshooting** below.

3) Troubleshooting (iPhone)

- **“Live” toggle is crossed out / disabled**
  - Use a **~2.4–2.5 s** clip (this download already is).
  - Ensure you actually selected the **Live Photo** version exported by VideoToLive.
  - Ensure the source video has a total number of frames > 60.
  - If necessary, re-export the Live Photo and try again.
- **It doesn’t animate**
  - Live animation works on the **Lock Screen only** — press and hold.
  - Check **Settings → Accessibility → Motion → Reduce Motion**: if ON, try turning it **OFF**.
- **Motion looks sluggish**
  - Re-export in VideoToLive with a slight **speed-up (1.25×–1.5×)**, then set again.
- **No sound**
  - Expected. iOS wallpapers are **silent by design**.
- **Home Screen doesn’t animate**
  - Expected. Live animation is **Lock Screen only**.

4) Android — Quick Guide (optional use)

In principle, you can also use this file to create a video wallpaper on Android. However, Android devices vary. Live Photo is an Apple format, but you can use **video wallpaper** apps.

Generic steps (may vary by device):

1. Download the **MP4** to your phone.
2. Install a reputable **video wallpaper** app from the Play Store.
3. Open the app → choose the downloaded video → **Set as wallpaper** (Lock screen and/or Home screen).
4. **Audio:** Most Android lock screens also **do not** play sound; some apps let you keep audio **only** on the Home screen. However, the video provided here is silent by design. If you prefer or need sound, consider buying a licensed pack including the original file.

5) FAQ

Q1: Can I use this in a YouTube/Twitch/Instagram/TikTok video?
A: Not under the **Free Personal** license. It’s for personal wallpapers only. For creator/monetized use, see **Extended Personal/Creator** licenses in our shop.

Q2: Can I use this on my brand’s social channels or website?
A: Not under the Free Personal license. See **Commercial-Micro** or higher licenses in our shop.

Q3: Why is there no sound?
A: iOS live wallpapers are **silent** on the lock screen. This is by design. As a result, the video

prepared here is already silent by design as well. If you prefer or need sound, look for a paid licensed pack that includes the original full clip in our shop.

Q4: Why won't it animate on the Home Screen?
A: Live wallpapers animate on the **Lock Screen only** on iOS.

Q5: The Live toggle is disabled—how do I fix it?
A: Use a **~2 to 2.4 s** video with at least 60 total frames as the basis for your Live Photo. Re-export with VideoToLive; confirm you picked the **Live Photo** in Settings → Wallpaper → Add New.

Q6: Can I redistribute or upload the file to share with others?
A: No. Redistribution/resale/re-uploads are prohibited. Please share our **product link(s)** instead.

Q7: Is this AI-generated? What are my rights?
A: Yes—**AI-assisted, human-directed** with substantial editing and original soundtrack production across our catalog. Your usage is governed by the included **Free Personal License**; upgrade options are available for creators and businesses, see links in our shop.

6) Support & Contact

- If you need help, email office@positiveaiart.com.
- Want creator or commercial rights? See our shop for licensed packs of original clips.

7) License Summary (Free Personal)

- **Allowed:** personal device wallpaper; minimal edits for device fit; personal backup.
- **Not allowed:** monetized use, brand/corporate use, redistribution, packs/templates/apps, training AI, unlawful or misleading use (pretty much anything else).
- For full details, read **"LICENSE-free-personal-positiveaiart.pdf."**
